## Introduction

The Public Library Survey is created by the Institute of Museum and Library Services (IMLS), and is in turn collected by state and territory-wide library organizations across the country. The report provides a broad statistical summary of a year in the life of a public library, from visitation and programming, to finances and staffing, to circulation and holdings (both physical and digital). It is requested annually from every public library in the nation.

Data in the report is used at the national level, by IMLS, legislators, and other parts of the federal government; at the state level, by our department and state government; and locally, by libraries, local government, and members of the public. For all of these varied end users, the data within the report helps in planning for the future and documenting the significance of libraries.

The data within this report is based on libraries' last fiscal year completed by October 15, 2018, though a small number of libraries have submitted fiscal years that finished on December 31.

It is only through the efforts of local libraries that we are able to create this report and make the data available state and nationwide. We greatly appreciate all of the hard work that goes in to collecting and submitting this data. In FY18, 155 public libraries within the state (of a total of 183) submitted their statistical information.

Please note, in the following pages "State Median" refers to the median number for *all* libraries who have submitted, while "Page Median" counts the median only amongst the current population category (5000+, 5000-2500, 2500-1000, under 1000).
