Introductions

    Name, library/location, what ILS you use

Recap on Catalog Month – Feb 2023

    Suggestions for future topics: Classification

    Niche Academy: https://my.nicheacademy.com/vtlibwebinars/pathway/58272

    Webinar recordings VTlib page: https://libraries.vermont.gov/services/continuing-education-and-certification/recorded-workshops

Questions for discussion:

Subject headings - "What would be the easiest way for a solo-ish librarian to identify subject headings that need to be made more current and relevant? I'm thinking specifically terms that are now considered racist, but I know I have many topics to update. For example, I had someone ask how they could find  books supporting black lives matter."

    "find a comparable record, see what books that already addressed this topic are listed as already in the catalog" – Veronica Golden

    Consistency!

    For LGBTQ+ language and headings : https://homosaurus.org/

        Code- $2 Homoit

Series – "I am not really clear on how the 490 and 800 fields differ and why both are needed. What am I missing?"

    Consistency!

Changes in AACR2 to RDA – "Will you provide us the changes that you both are discussing in RDA?"

    RDAToolkit! – Could this be a statewide resource?

    RDA Stands for "Resource Description and Access"

Roundtable – Optimal time? What do you want out of it? Email list for this?

    No email list, but last Tuesday 10-11 am works!

Uploading Marc Records to OCLC – "One topic of discussion that would be of interest to me that has come up briefly in our consortium (Catamount Library Network (CLN)) is if we should be uploading records to OCLC. I don't know anything about it, so I'd be interested to hear what others do."

<u>Cataloging News or Resources to share:</u>

Tutorial on how to download a Marc Record from Clover: https://www.youtube.com/watch?v=K61BgNZ6b6s

All libraries have a Clover login! Contact: April.Shaw@Vermont.gov

<u>Conundrums:</u>

Duplicate records and inadequate records

Getting MARC records for items in different languages with non-roman scripts, accents, special characters, diacritics

Compare, OCLC

Could depend on the way you import a record, uploading vs pulling in from Z39.50 search

<u>Successes:</u>

Special characters/accents/diacritics: Using Amazon, Goodreads, Google, KOHA table, or codes: https://sites.psu.edu/symbolcodes/windows/codealt/

"Catamount people, there's a whole page of the diacritics equivalents in in the in a handbook that we have and that for them can be found on base camp." – Wendy Sharkey

DIACRITICS

Thank you to Leslie Markey (and others) from the Catamount Library Network for this document

- å - bolle

- æ - ligature

- œ - ligature

- ē - macron

- č - háček

- ŭ - crescent

How to make a copyright symbol from the keyboard for text documents:

How to make a Copyright C Symbol on a PC Keyboard (©):

This should work for all PC keyboards when you need to type a copyright symbol.

It should work on WYSIWYG html programs when you insert copyright symbols

and of course any word processor where you need to make a copyright symbol with

your keyboard from standard fonts installed.

Hold down Ctrl and Alt at the same time and press C

 Ctrl+Alt+C               ©

Hold down Alt and type 0169 on the number pad (right hand side of your keyboard)

Alt+0169                    ©

More codes can be found here: https://sites.psu.edu/symbolcodes/windows/codealt/

Using © RDA field 264:

264 _4 ©

If unknown elements:

264 _1 _a[Place of publication not identified] :

        _b[Publisher not identified],
